

# SLEUTHING

## **5 Steps to Create a Data Collection Program**

Kyle James | BCDCOG  
June 8, 2023

*General Store*

*Restaurant*

*15 Mile Landing Rd*

*Seewee Rd*

*Dollar Store*

There are 15,000  
vehicles/day.

**How many  
bicyclists?**

There are no bicyclists  
at this location.

**Did the turning movement counts show no bicyclists?**

We didn't collect data  
on bicyclists.  
It's a major highway.

Problem:

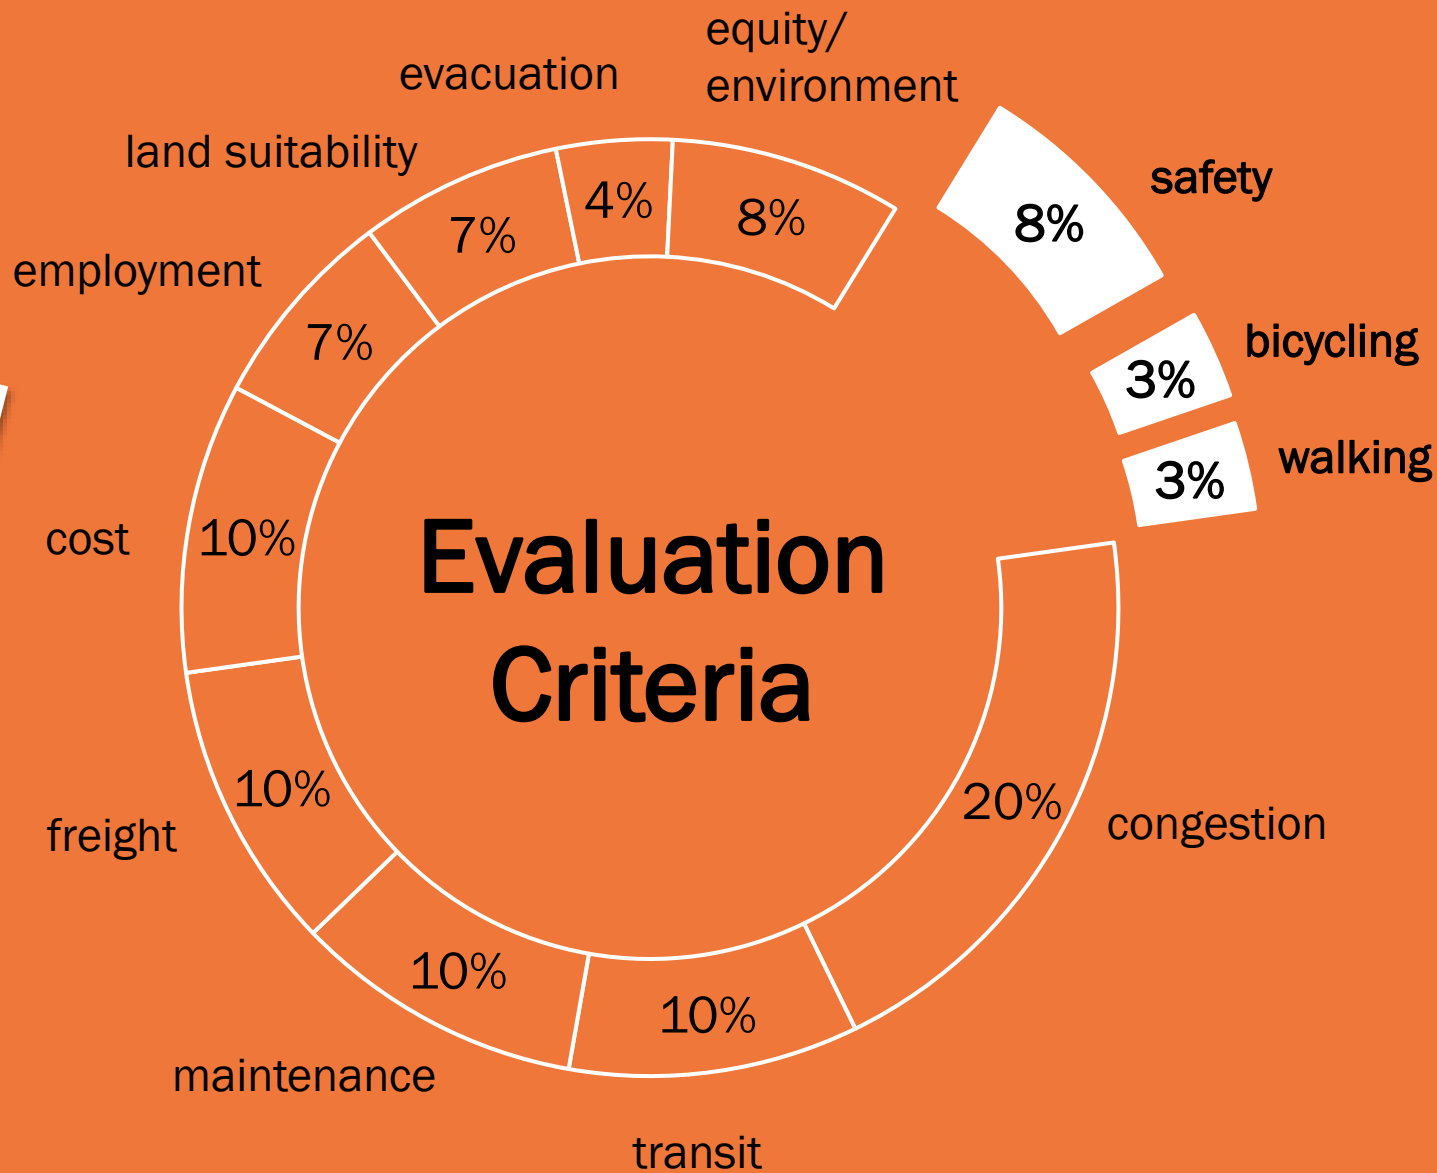

If it isn't measured,  
it doesn't count.

# CHATS Long-range Transportation Plan (2040)

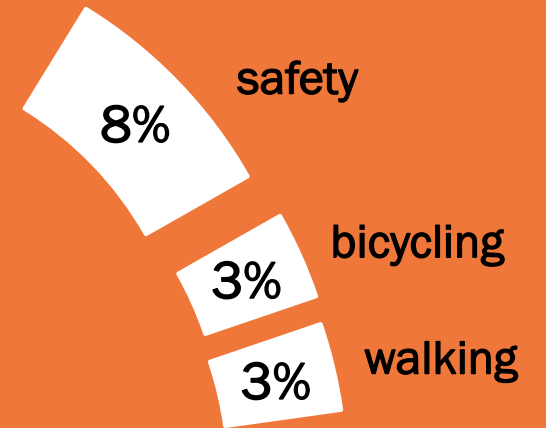

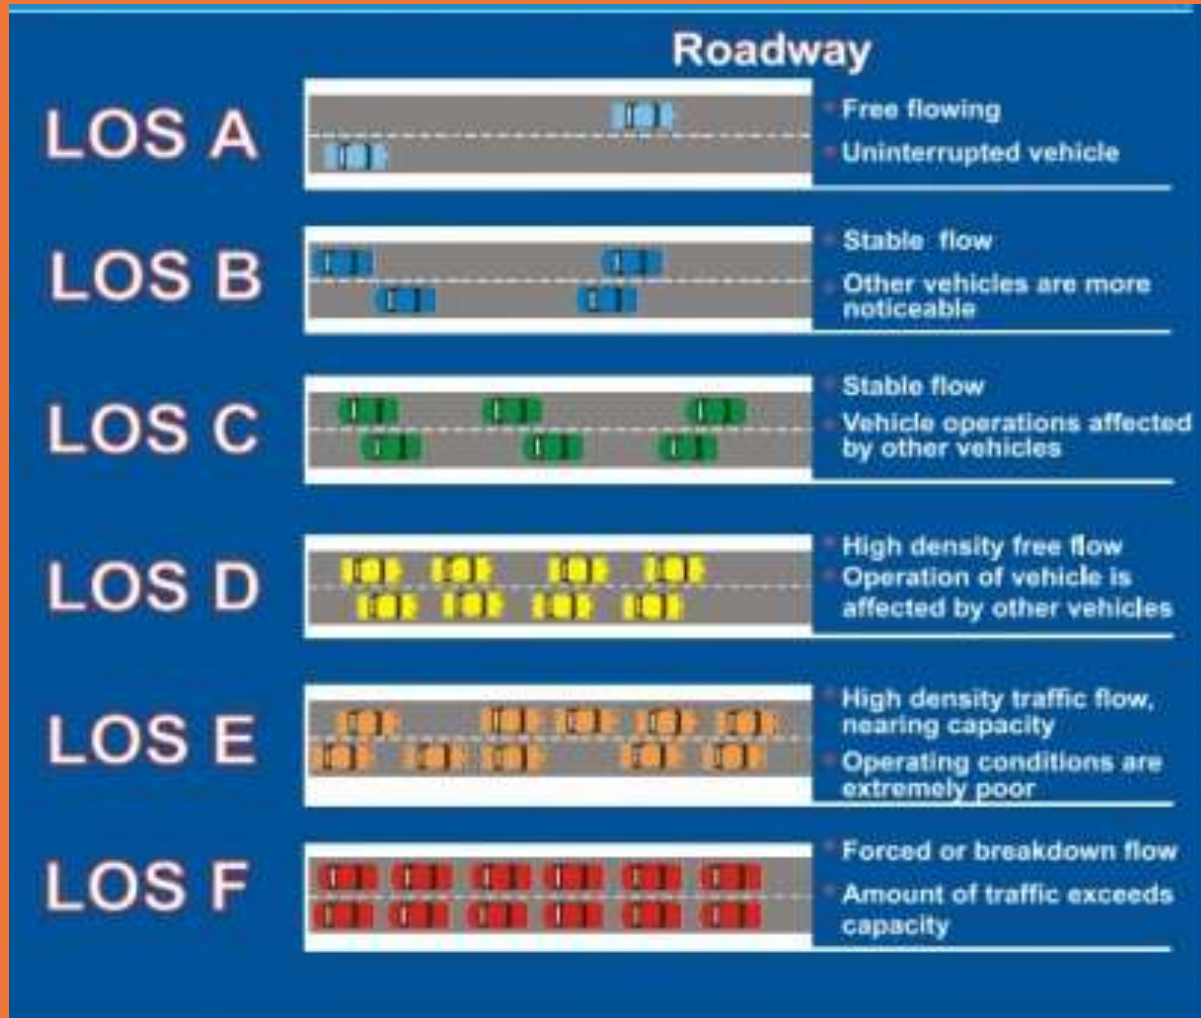

# Evaluation Criteria

- # of crashes near proposed project
- Near an existing/proposed bikeway
- Near an existing/proposed walkway

# Fiscally-Constrained Projects (2021-2030)

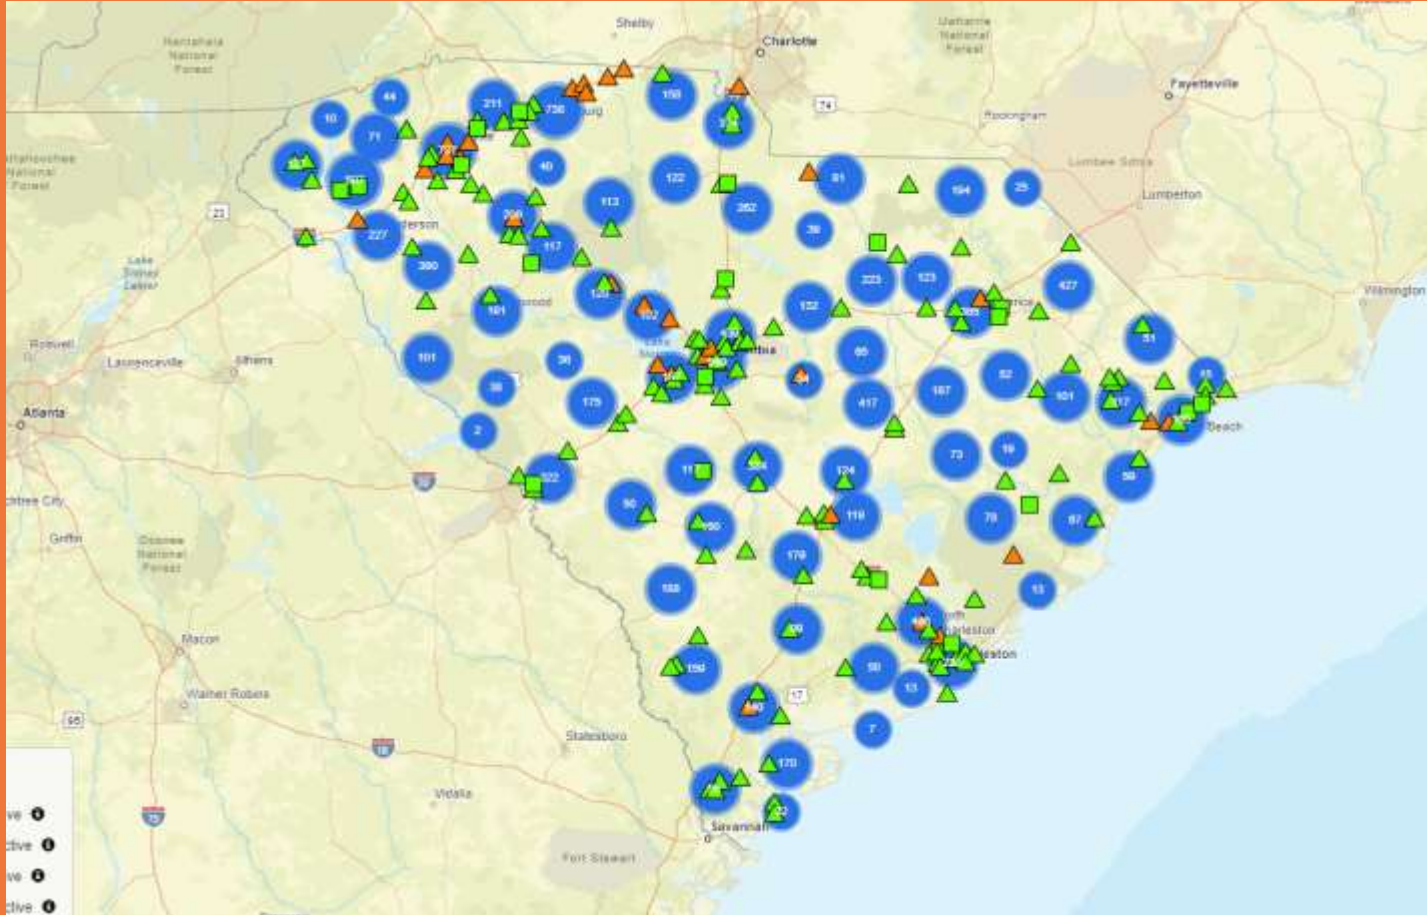

We've built an industry around measuring auto throughput and delay

**How many traffic count stations  
are in South Carolina?**

- A. 500
- B. 1,500
- C. 5,000
- D. 7,500

SCDOT monitored  
**~11,500**  
short-term stations  
**+ 170**  
continuous stations  
in 2022

Source: SCDOT

**If it costs approximately \$23/hour  
to process motor vehicle TMCs,  
how much more is it to include  
bike/ped counts?**

- A. \$2.00/hour
- B. \$5.00/hour
- C. \$7.50/hour
- D. \$12.00/hour
